

HEK-IT10 lysate

Cat # NB-19-0037

Overview

Product Name: HEK-IT10 lysate

Quantity: 4,6 mg (1 unit)

Cell line: HEK 293 (embryonic human kidney) with p6HisIT10GFP plasmid

Medium used: RPMI and 10% FBS (Fetal bovine serum)

Description: HEK 293 cell lysate was prepared by homogenization in RIPA buffer (50 mM Tris-HCl pH 7.4, 1.5 M NaCl, 2.5% deoxycholic acid, 10% NP-40, 10 mM EDTA) + protease inhibitor. Cell debris was removed by centrifugation.

Properties

Purity: Whole Cell Lysate

Storage Buffer: RIPA buffer + protease inhibitor

Storage Instruction: Samples should be stored at -80°C. Avoid freeze-thaw cycles

Applications

Tested Applications: Western blot.

Bulk quantities also available.

For Research Use Only. Not for Diagnostic or Therapeutic Use.
